

## Resources for Recycling Computers, Computer Monitors & Televisions

Computer monitors and televisions contain Cathode Ray Tubes (CRTs). The State of California has determined that CRTs are now a hazardous waste. CRT's contain high quantities of lead and other heavy metals, which can cause poisoning in individuals and can be especially harmful to young children.

***CRTs are hazardous; therefore they CANNOT be disposed of in landfills.***

Orange County Households may properly dispose of their CRTs at an O.C. Regional Household Hazardous Waste Collection Center. (Business generated waste is not accepted.) For information on hours and locations, visit [www.oclandfills.com](http://www.oclandfills.com) or call (714) 834-6752. Below is a partial listing of local companies that will accept CRTs and other electronic and computer-related products from businesses. For a complete list, visit the California Integrated Waste Management Board's website at [www.ciwmb.ca.gov/electronics](http://www.ciwmb.ca.gov/electronics).

Name	Location	Telephone/Internet Address	Acceptance Information
